Tradition holds that for untold generations, Tanana Athabascans used the ridge the Fairbanks campus is built on, Troth Yeddha', to pick wild potato. It was a meeting place and a place of sustenance, and it is still a place where people work together and find intellectual nourishment.

The University of Alaska Fairbanks is proud of the students here today who have continued this tradition of collaboration and learning. Commencement is a special time for graduates and their families and friends who come to share this momentous occasion. This ceremony represents an ending, a time of reward for academic endeavor successfully completed. In another sense it is truly a commencement, a beginning, for the learning process is an unending one, to which the years of formal schooling are only a prelude.

On May 3, 1917, Alaska Territorial Gov. John Strong signed the bill accepting a land grant from the U.S. government for the creation of a college in Fairbanks. In 2017, we celebrate 100 years of progress in higher education in Alaska.

Along with our graduates, the University of Alaska Fairbanks acknowledges with pride the contributions of those who will receive honorary degrees or meritorious service awards. The university also expresses gratitude to the dedicated faculty and staff who are retiring this year. Each has made a distinct contribution to the quality and reputation of this institution.

thesis: Evaluation of Crack Sealing Techniques in Alaska's Asphalt Concrete Pavements

Thermal cracking is one of the most prevalent asphalt concrete pavement distresses in Northern states and countries. Field observations were conducted on 91 asphalt concrete rural road sections of the contiguous road system in Alaska where three different evaluation methods were used and statistical methods employed to compare the data.

thesis: Water Security in the Rural North: Responding to Change, Engineering Perspectives, and Community Focused Solutions

The research investigated how people respond to environmental change, with a focus on current climate and social change issues, to address the need for an alternative paradigm through which water security challenges in rural Alaska are

Reid Sinclair Brewer *

Ph.D. Marine Biology

B.S., United States Military Academy, 1995; M.S., University of Alaska Fairbanks, 2003.

thesis: Population Biology and Ecology of the North Pacific Giant Octopus in the Eastern Bering Sea

Though the North Pacific giant octopus represents a significant incidental catch in Alaska, little is known about its ecology, and therefore management is also limited. A three-year mark-recapture study was performed to estimate growth, movement, reproduction, abundance and survival to guide future management of this data-poor species.

thesis: We are the Safety Net: Skills for Suicide Prevention Evaluating a Training to Increase Recognition and Response to Signs of Suicide Among At-Risk Peers

An evaluation of a brief suicide prevention training showed that the intervention increased suicide literacy, confidence about safety planning, and self-efficacy when seeking help on behalf of an at-risk peer. Significant differences were found in the ability to recognize peers at risk for suicide and act effectively on their behalf.

thesis: The Relationship Between the Indigenous Peoples of the Americas and the Horse: Deconstructing a Eurocentric Myth

This project deconstructs the history of the horse and its relationship with the indigenous peoples of the Americas. Critical indigenous research methodologies and grounded theory are utilized in tandem to reconstruct this history to include cross-cultural translation, the traditional knowledge of many indigenous peoples, Western scientific evidence, and historical records.

Forest harvest management has a 40-year history in boreal Alaska. Historical forest harvest is much smaller than the allowable cut. Only white spruce receives regeneration assistance. Management affects regeneration weakly compared to landscape environmental factors. Regeneration, largely successful now, would begin to fail with warming. Adaptive management planning approaches are needed.
