

is a new outreach effort by OGCA. The idea behind is to convey tips, tricks and other helpful information around the area of research administration. Our goal is to post on (almost every) Tuesdays. If there is something you would like to see covered on , email: UAF-GCReATE@alaska.edu. For more Tips visit [OGCA website](#).

Federal Agencies and Funding

Every year, the federal government grants billions of dollars in research funding to academic institutions to drive knowledge and innovation in numerous fields, including biomedical science, engineering, social sciences, and the humanities. Though highly competitive, these grants are essential to the university research enterprise. The 26 federal agencies that award research funding -- NIH, NSF, NEH, and DOD, among them -- post open opportunities at the central Grants.gov site.

Search for Department of Defense grants through this Grants.gov search.

Search Grants.gov for federal grants by keywords or more specific criteria. All discretionary grants offered by the 26 federal grant-making agencies can be found on Grants.gov.
