Report Comments

This report aggregates the s

responses in the form of frequency distributions that show the percentage of agreement (5: Strongly

As a general rule of thumb, items that show above 75% agreement suggests that students have a positive experience with that particular item/s. Items in the 60-75% agreement range warrant some reflection on how students' experience can be improved. Items with a below 60% agreement signal that further investigation and actions to address the issue/s are required. Items with a

The frequency distributions should be interpreted together with students' reasons for response in the open-ended items.
