**D. ESTIMATED IMPACT**

*WHAT IMPACT, IF ANY, WILL THIS HAVE ON BUDGET, FACILITIES/SPACE, FACULTY, ETC.*

Budget: This is an asynchronous web based course cosponsored with the Center for Distance Education. CDE has funded course development costs. CDE will advertise the course in the Distance course schedule  
Facilities/space: **Master of Education in Online Innovation and Design** ~~M. Ed. in Instructional Technology Innovation~~ is being developed in partnership with the Center for Distance Education. All courses will be web delivered through UAF's existing Blackboard system. No new space will be needed.  
Faculty: ED 601, ED 603 and the Cross-Cultural foundations classes are currently included in existing faculty workloads. The new classes are being developed through a cooperative agreement between the School of Education and the Center for Distance Education. Faculty workloads for SOE employees will be adjusted as needed and approved by department heads and SOE Dean.

**E. IMPACTS ON PROGRAMS/DEPTS:**

*What programs/departments will be affected by this proposed action?  
Include information on the Programs/Departments contacted (e.g., email, memo)*

The School of Education and the Center for Distance Delivery. Both departments have had equal input into the proposal for this M. Ed. concentration and the development of the new content courses.  
With the new concentration the School of Education will be able to offer a web based, asynchronous Master of Education with emphasis in education technology, **Master of Education in Online Innovation and Design** ~~(M. Ed. in Instructional Technology Innovation)~~.  
The Center for Distance Education will manage the web course development, scheduling and advertising of individual courses. Student files will be housed in the School of Education. Student advising will be provided through the School of Education graduate advisor and faculty, as with existing M. Ed. students. School of Education faculty will serve as graduate advisory committee chairs. Student numbers in the Master of Education program will increase. Core M. Ed. courses will see an increase in student enrollment (ED 601, ED 603, cross-cultural studies courses). There is further positive benefit to students, especially those in rural Alaska, who will have greater access to the M. Ed. program.

The additional concentration has been under development for the past 3 years. Conferences, such as Educause and AACTE, were attended to explore different delivery methods. Reports were made to School of Education faculty. Course/program developers presented at SOE faculty and departmental meetings. All planning materials were published via WIKI's, Blackboard and blogs. Materials were also sent out via email and were posted on Google docs for faculty viewing and editing.

Convocation speech, September 9, 2010

"It's clear that our student market is shifting. If we do not choose to embrace this change, our students will choose other universities. It would be unwise for UAF schools and colleges to ignore these realities, even if we do need to address some internal organizational issues. I recognize that not all faculty members embrace the use of online and other technologies to enhance the teaching and learning experience, and recognize that not all courses can be taught via distance. But if we don't adapt to the extent possible, our students will go elsewhere and our opportunities will be limited."

An informal survey was administered to gauge interest in the new M. Ed. concentration. There were 50 responses to the MITI survey. Twelve of the respondents (24%) said they were very likely to enroll if SOE offered an advanced degree in instructional technology. Another 21 (42%) said they were somewhat likely to enroll. Based on the survey, 33 students have shown interest in this degree program.
