**JUSTIFICATION FOR ACTION REQUESTED**

The purpose of the proposed curriculum modification is to ensure that the quality of UAF education is not lowered as a result of the proposed change. Please address the following questions: This action is needed to... course, is it because the material is covered elsewhere? If so, which courses are needed to fully justify the proposed change and why? How will the proposed change be implemented? How will the proposed change be evaluated?

Teacher education programs are elementary where's more efficient, pertinent knowledge and skills in the areas of... and that they have clearly defined course work... they also have opportunities to acquire... to successfully teach and develop existing curriculum in multiple content areas

UAF elementary teacher education interns... and require... and requirements... not been accurately reflected in the current distribution of credits... year. As an artifact of the process of development of the original PAE degree, the number of hours that interns spend in their elementary classroom placements... been accurately reflected in the course credit allocation.

It is important that you articulate these concerns in accurate, thoughtful, and specific reasons.

External agencies (public... and accreditation groups) now want more specific evidence that elementary teacher education students have dedicated coursework and internship requirements to prepare them to teach... reading, writing, math, science, PE/Health and the Arts. This evidence needs to be reflected more accurately on our program requirements... more accurately on our program requirements... students... courses so that the content of the courses is more clearly evident to reviewers.
