ORIGINAL

The UAF Faculty Senate passed the following at Meeting #191, May 6, 2013: MOTION: The UAF Faculty Senate supports continuation of the PhD Degree in Mathematics on the condition

Senate and to the Provost demonstrating success in meeting the intent and milestones of its plan ("Revitalizing the Mathematics Ph.D. Program at UAF"), submitted to the Faculty Senate and attached here. These reports are to be submitted by the Program Review document deadline

To Whom it May Concern: Englocad places and an draft plan for 'Dovitalizing the Mathematica Dh D program' at IIAF This plan has been drawn up over the course of several months, in consultation with the Provost and CNSM Dean, who support our revitalization plan at this time. The expectation is that more faculty members will be involved

MATHEMATICS PH.D. REVITALIZATION PROPOSAL

	The Department of Mathematics and Statistics proposes the following plan for revitalizing its Ph.D. Program.

- the faculty member's area of research, soliciting students who are interested in working in that field, and following up with calls to interested students who apply.
- (8) Meeting with personnel from the Office of Admissions and CNSM to discuss other ways to enhance recruiting.

REVISED PROGRAM FOR PH.D. STUDY

The current Ph.D. requirements, which were designed to reach an acceptable consensus across the full department (including those opposed to the program) are modeled more on those of much larger math departments, and are not practical for our size.

• If possible, administer a Ph.D. exam

Year 3:

- Recruit for Ph.D. students
- Admit 1 2 Ph.D. students (that is, students who have the intention of pursuing a Ph.D.,

• Ideally, approve a dissertation research proposal and advance a student to candidacy

Year 4:

- Recruit for Ph.D. students
- Admit 1 2 Ph.D. students (that is, students who have the intention of pursuing a Ph.D.,

- Administer Ph.D. exams
- Advance a student to candidacy, if possible

Long-term: Graduate the equivalent of 2 Ph.D.s every 3 years.
