ATTACH COMPLETE SYLLABUS (as part of this application).

Note: The guidelines are online: http://www.uaf.edu/uafgov/faculty/cd/syllabus.html
The department and campus wide curriculum committees will review the syllabus to ensure that each of the items listed below are included. If items are missing or unclear, the proposed course change will be denied.

ensure that each of the items listed below are included. If items are missing or unclear, the proposed course change will be <u>denied</u> .
SYLLABUS CHECKLIST FOR ALL UAF COURSES During the first week of class, instructors will distribute a course syllabus. Although modifications may be made throughout the semester, this document will contain the following information (as applicable to the discipline):
1. Course information:
lacktriangle Title, $lacktriangle$ number, $lacktriangle$ credits, $lacktriangle$ prerequisites, $lacktriangle$ location, $lacktriangle$ meeting time (make sure that contact hours are in line with credits).
2. Instructor (and if applicable, Teaching Assistant) information:
lacksquare Name, $lacksquare$ office hours, $lacksquare$ telephone, $lacksquare$ email address.
3. Course readings/materials:
lacksquare Course textbook title, $lacksquare$ author, $lacksquare$ edition/publisher.
lacksquare Supplementary readings (indicate whether $lacksquare$ required or $lacksquare$ recommended) and
☐ any supplies required.

so that it is clear that the instructor has thought this through and will not be making it up on the fly (e.g. it is not adequate to say "lab". Instead, give each lab a title that describes its content). You may call

juniors and seniors with at least 1 biology and 1 math class completed; first offering in Spring 2011

Course Goal: One of the primary commitments of the University of Alaska Fairbanks (UAF) School of Fisheries and Ocean Sciences (SFOS) is the training of future professionals in the field of ocean sciences. Public agencies and marine industries throughout Alaska and beyond need knowledgeable and experienced freshwater and marine scientists, technicians, economists, social scientists, and managers focused on the larger field of marine conservation and sustainable use. Skeleton articulation in the classroom setting opens the door for a broad range of topics ranging from mechanics of locomotion, animal physiology, cultural significance of the animal, using learned information as a conservation management tool while at the same time providing a hands-on, cooperative approach to scientific discovery. The unique ability to use marine mammals as a teaching tool underscores the exceptional opportunities Alaskan youth have to learn while making positive, beneficial contributions to a world-wide scientific knowledge base.

Student Learning Outcomes: By the end of the class, students should be able to:

- 1. Be familiar with the chosen specimen and the physical means by which it interacts with its environment.
- 2. Be familiar with anatomical and physiological terminology, such as the names of bones, the bone's contribution to overall structure and fu

2011 demonstrated that the days and times are likely to change. Each class will begin with a 1/2 hour lecture followed by 1.5 hour lab. Students will be required to commit 4 hours a week. Class discussions will be determined by the instructor based upon progress during the articulation process. There is some flexibility "built in" in the course calendar. The exact condition of the specimen to be articulated will be unknown until such time as it is needed for the class

There is no required text for this course. Upon signing up for this course, initial training in laboratory and equipment safety is conducted. This has been coordinated with UAF's EHSO and they receive all student quizzes to ensure compliance. The students will receive a packet that includes this syllabus and several handouts detailing the preparation for and the process of skeletal articulation. Articulation manuals, bone treatment manuals and medical texts will be available in the classroom.

Assignments: A final report of the experience accounts for 25% of the grade, and is mandatory. No student can receive more than a C without submitting the final report. The reports will be graded based on content and must demonstrate the following: 1) W
