**For Discussion:**

Bylaws: Calculation is done to apportion 35 elected seats. However, any unit that qualifies for separate representation gets a minimum of 2 senators (and 1 alternate). Currently this applies to the 4 units with < 27 faculty: IARC (10), GI (17), SoED (23) and SOM (24). Units with 9 - 44 faculty all have 2 senators. (See table below, left.)

Note that in 2010 a unit with 9 faculty could qualify for separate representation. This unit would be expected to send 2 senators and 1 alternate to the Faculty Senate, 1/3 of its total faculty.

Options: (1) Current system. (2) Remove "minimum 2 senators" rule and allocate seats strictly by # faculty. (3) Change the target # senators (increase to 39 or 40?). (4) Change rules for units to qualify for representation (minimum # faculty).

Note that the "minimum 2 senators" rule results in an increase in total number of senate seats over the target of 35. Faculty Senate now has 39 elected senators.
