

GRADUATE

QUEST 1.

ALPHABETIC ORDER OF A SYSTEM

1. The first step in the process of identifying a system is to determine the boundaries of the system. This is done by identifying the inputs and outputs of the system. The next step is to identify the components of the system and their interactions. This is done by identifying the processes and data flows within the system. The final step is to identify the relationships between the components and the system as a whole. This is done by identifying the control and feedback loops within the system.

1. The first step in the process of identifying a system is to determine the boundaries of the system.

1. The first step in the process of identifying a system is to determine the boundaries of the system.
