Prisoner Information System

Prisoner Information System (PIS) is a web-based application that provides a secure and efficient way to manage inmate information. It is designed to be used by staff members who are responsible for tracking and reporting on inmate activities. The system is accessible from any computer with an internet connection and a valid user account. It provides a comprehensive overview of inmate information, including personal details, criminal history, and current status. The system also allows for the creation and management of inmate profiles, and provides a secure way to communicate with inmates. The system is designed to be user-friendly and easy to navigate, and provides a secure and efficient way to manage inmate information.
