

À A concern about older infrastructure and deferred maintenance on rural campuses was expressed. A significant amount of deferred maintenance is currently underway. This is associated with _____, four years ago, to begin funding deferred maintenance at a core level of 37.5 million a year, of which UAF is receiving 22 million. These amounts were determined by a formula that took into account the age of buildings and other factors. This year, the largest pieces are planning and design for the combined heat and power plant and planning for the revitalization of West Ridge, which is essentially major deferred maintenance projects on Elvey deferred maintenance project also included upgrades to sewer systems. Each year we have asked for, in addition to the 37.5 million, 50-100 million to assist in making progress on some of these items.
