

MEETING MINUTES

d. **Trails Planning, Review of the Revised UAF Trails, Goals, Objectives and Performance Measures**

Been working with Jonathan and north trails folks, and tasked with looking at the trails primarily in the core part of the campus, and looking at connectivity. What kind of challenges and opportunities do we have with ours at UAF? Comments are welcome. What do you think the trails need to look like. Important questions:

What challenges or obstacles do you see currently that discourages you from
What opportunities do you see to build a better tr

Phasing and prioritization. Hopefully this plan will lead to implementation. This is meant to be a plan that has a final product that makes people feel as if their voices are heard. The campus is used in two ways: one to get to class or work functionally for staff or students. The other part is how people recreate and get around and connect to those trails. Some students whom do not want to live in Fairbanks, want no snow to get to classes, want a heated bubble tunnel to get around. Other stud because they like Fairbanks, they want to climb over the dome, or hill or go through path in the fo a different dichotomy in how people use trails. Some people want the experience of the trails, and are out there and enjoy the temperatures and there are some people that just want the ease of getting their coffee. One other thing is the way people are transporting. The technology has changed. People are cruising through on their bikes that are winter capable. This is also the first-generation of people that are Changing some of the way those trails are perceived. If you were on the trails before on skis, now bikes are coming through. This is a great way to entertain tourists, if you bring visitors you can encourage walking tours to experience the campus. To let you know where we are within the process, we have discovery week. After this, ur plan is to draft and document in January/February, and then enter into a review and approval process that takes it forward. We have the blog up and running. The e lot on it yet. on to it overview, before going around the table. Questions about process or how?

www.uaf.edu/trailsandgreenways.blogspot.com I will send out an email about it.

Does your scope include considering the interconnectivity regarding the borough
ome people have been very clear about connections to the ends. Can we go over the process again? W . This week we are trying to fill in all of the missing links. There will be a map that comes forward with decisions that need to be made on it. Talking with Bear, he points out that any trails through some of the wilder parts of campus really need to have a clear width of about 8 feet. In winter we have to have room for snow. The taller

stuff. There

body which may include faculty and staff housing. Possibly open to other people also?
